

Secure It Day

Secure It Day is an opportunity to take inventory of your online accounts and fix vulnerable areas.

Areas to Review:

- ✓ Are you connecting to secure networks and sites?
- ✓ What do you consider before downloading new apps?
- ✓ Do your screen names disclose personal information?
- ✓ What information does your profile picture reveal to the world?
- ✓ Passwords – Have you shared any? When is the last time you changed them?
- ✓ Have you turned on privacy settings on all of your accounts?
- ✓ Have you removed unknown friends and followers?
